

TOP KOTE SELF POLISHING FLOOR FINISH

PRODUCT DATA SHEET

PRODUCT DESCRIPTION

TOP KOTE is a self-polishing floor finish designed to be used over most sealers. TOP KOTE dries to a crystal clear, scuff resistant coating which will protect and prolong the life of the sealer below. TOP KOTE is used as a regular maintenance product to refresh the appearance of a floor. Use when a **glossy** look is desired. **For interior use only.**

RECOMMENDED SURFACES

- Mexican Saltillo
- Travertine
- Marble
- Unglazed Tile
- Terrazzo
- Stone, Brick, & Clay Pavers
- Any surface where gloss is desired

COVERAGE

500+ square feet per gallon

Allow 30 mins to 1 hour between coats to ensure the previous one is completely dry.

SURFACE PREPARATION

Always be sure surface is clean, dry, and free from any dirt, grease, oil, wax, or other contaminant. Read the entire label before using. Use only as directed. Always test on a small piece of material or a small inconspicuous area to determine suitability. Ideal surface temperature should be between 60°F and 80°F.

APPLICATION

Clean tiles with Catalina Chemical's Neutral Cleaner. Rinse surface with clean water. Let surface dry.

Pour ample amount of TOP KOTE into a clean pail or bucket. Soak a clean, lint free cotton or rayon mop with the finish. Squeeze the ends of the mop to eliminate excessive dripping. Spread TOP KOTE to the surface evenly, smoothly, and uniformly, overlapping each stroke. Let the weight of the mop apply the finish. Reload the mop with finish as needed. Do not leave puddles or voids. Work systematically and in small areas at a time.

A second or third coat of TOP KOTE may be applied, depending on the amount of gloss desired. ALLOW 30 minutes to an hour drying time between coats.
